Filo _Sconce

Essential and functional, the Filo sconce is designed to provide adjustable lighting in modern interiors. It is available in two different sizes, making it easy to adapt to spaces of various dimensions. The painted metal structure with a matte finish, offered in red, white, or black, features a continuous, slender line that recalls the profile of a stretched wire. The upper section rotates up to 200°, allowing you to direct the light as needed. The E27 socket with exposed bulb highlights the technical, minimalist character of the design. Ideal as an adjustable sconce for bedrooms, hallways, entryways, or offices, Filo brings a contemporary touch without compromising on practicality. Its clean design and compatibility with other models in the collection make it perfect for cohesive and coordinated lighting schemes.
